**IndustryComplete
Lightning Setup**

Document revision 1.0

www.provenworks.com

Install Industry Data

Click the **App Launcher**  and select the **IndustryComplete Administration** Lightning Component.

[Groups](#)

[IndustryComplete Administration](#)

[Lightning Page](#)

In the **Installation & Settings** tab, select the **Industry Standard(s)** from the available options and select **Install Industries**. *Wait for that process to complete before continuing.*

Install Industries

To install an industry-code standard, select it below before clicking the button below.

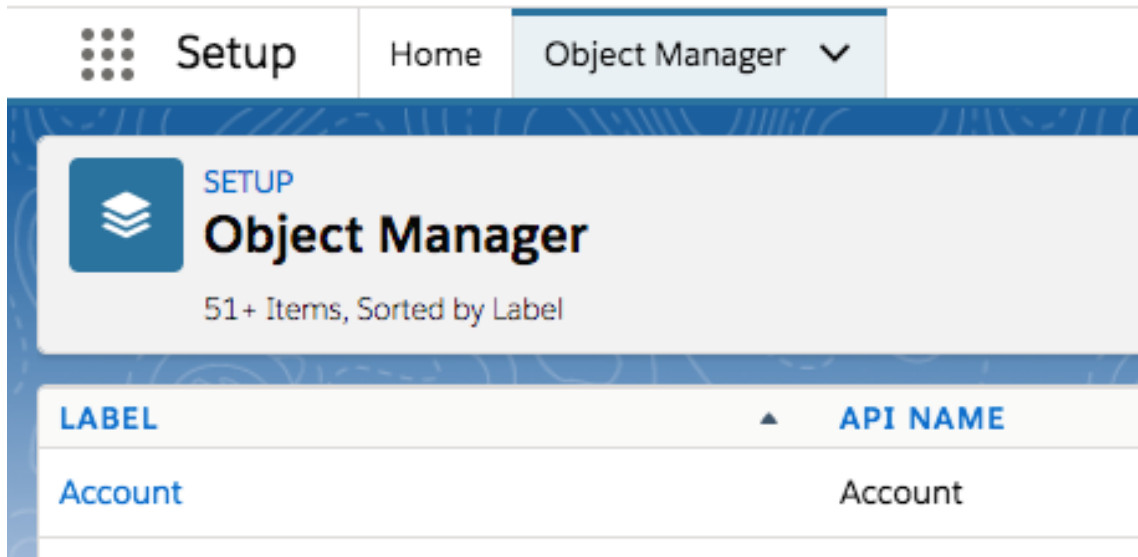

- ISICr40
- NAICS07
- NAICS12
- NAICS17
- USSIC87

[Install Industries](#)

Configure Industry Lookup Component

Navigate to **Setup**  and select **Object Manager**.

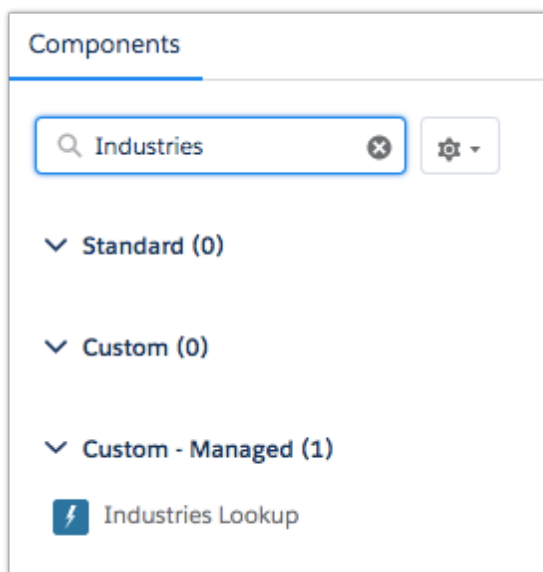

Select **Account** from the list of objects.

Select **Lightning Record Pages** and choose the **Lightning Record Page** that you are setting IndustryComplete on. *This step will be repeated if multiple pages are in use.*

Select **Edit**.

Search **Industries Lookup** from the **Lightning Components** list.

Drag the component onto your layout.

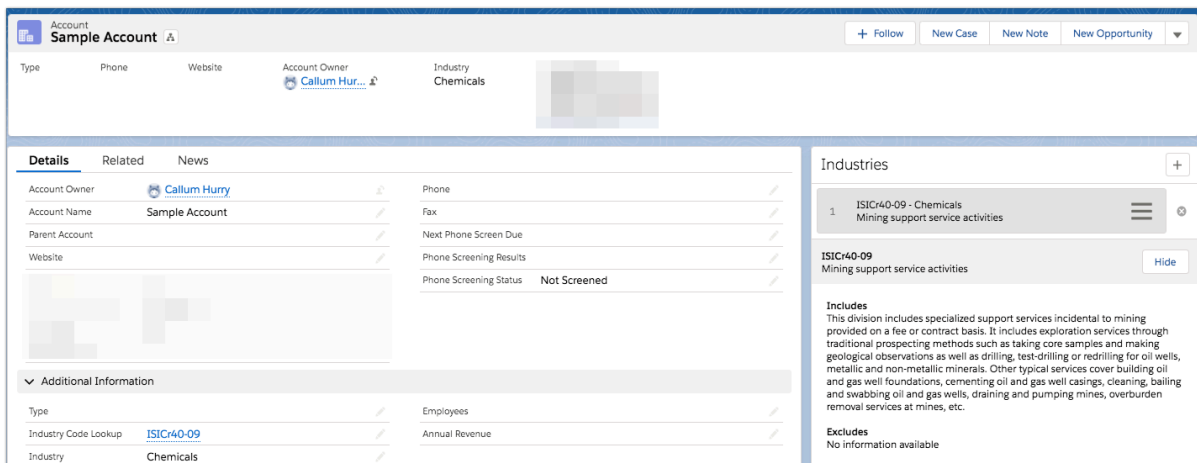

Press **Save** and then **Activate** if required.

Page > Industry Lookup

Now your account page(s) will be setup with the **IndustryComplete Industries Lookup** component ready for use.

Help & Support

If you have any problems with installation or configuration, please get in touch with us via email at support@provenworks.com where a member of the team will be more than happy to assist you with your setup.
